The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/579,574	<b>Applicant(s)</b> REICHEL ET AL.	
	<b>Examiner</b> ROBERT J. MCCARRY JR	<b>Art Unit</b> 3617	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 10 July 2008.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 22-27 and 31-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Reichel et al (US 2005/0166786).

Reichel et al discloses a track system for a rail vehicle comprised of a carrier defining a track plate 11 and connecting elements 12 extending transversely from the underside of the track plate 11. The carrier is supported on a bed 1. A compensation sleeper 28 is positioned between the bed 1 and the carrier 10. The compensation sleeper 28 is connected to the bed by means of a grout 20 and adjustable spindles 16. Reinforcement bars 29 connect the carrier 10 with the compensation sleeper. The adjustable spindles can be moved to allow for a desired spatial positioning of the carrier and the compensation sleeper relative to the bed. Both the compensation sleeper and the carrier are constructed of precast concrete and mounted in place on the bed and secured thereto.

### ***Allowable Subject Matter***

Claims 28-30 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

Applicant's arguments filed July 10, 2008 have been fully considered but they are not persuasive. Applicant argues that the prior art reference listed above does not adequately show a compensation sleeper, which is an independent clamping of the connecting elements. The Examiner has relied primarily on figure 8. Figure 8 shows the compensation sleeper mounted between the downwardly extending connecting elements. The Examiner has interpreted that since the compensation sleeper and the connecting elements are depicted by two different part numbers as well as being indicated with two different cross sectional patterns that they would be understood as two separate parts, cast of concrete and connected together by reinforcements 29.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
